EDUCATION

B.Sc. Computer Information Systems
Odessa State Academy of Refrigeration
Odessa, UA (2005)   GPA: 4.56

Specialty:
Network Structure & Security (+2 yr.)

CBDM & MT4 BACKEND DEVELOPER
SAB FINANCIALS LIMITED
Limassol, Cyprus   Jul. 2016 – Jan. 2017

- Setup of brand new MT4 trading network in **Equinix datacenters** over encrypted VPN tunnels. Reduced SYN/ACK time to <1ms.

- Integration of **Tier-1/Tier-2 bank bridges** into MT4 network for instant order execution based on Risk Management ACL's and policies. Developed a WebSocket app to **aggregate prices** from all involved parties to offer best bid/ask prices saving huge amounts of client's equity lost in fluctuating spreads.

- Implemented **TeamWox/JIRA** CRM's into corporate solutions package. and Integrated **Zopim/Zendesk** customer support suite reducing support tickets waiting interval to less than 4 hours.

- Development and implementation of a web based application to monitor server status across **multiple datacenters** and worked on **load-balancing** associated traffic based on originating countries and requested resource's availability among different servers.

- Worked closely with the CEO as a **CBDM** to strategically build global & regional partnerships. Negotiated deals and helped implementing **global bridging and price aggregation solutions** from **PrimeXM**

WEB DEVELOPMENT CONSULTANT
SPLASH TECHNOLOGIES
Ramallah, Palestine   Jul. 2014 - Jun. 2016

- Introduced a business plan for a national & **governmental powered** content-filtering system to be applied as an additional **security layer** by all ISP and offered to end users as an add-on service for their ADSL/xDSL plans.

- Administered a **sophisticated data mining** phase aiming to build **complex algorithms** able to detect adware, malware, phishing, pornographic and terrorism related content.

- Integrated custom **Google analytics and Tags** as tools to identify different **user segments** and implemented a secure delivery system for related system notifications to maintain high SLA's.

- Administered the development of **data encryption** routines to ensure all user's traffic and filtered data is never visible nor accessible to third parties while still being accessible by the system itself to build more advanced algorithms in the future.
